SUMMARY

A Computer Science graduate passionate about web development and building innovative, interactive games. I sharpened my technical skills through intensive programs at Tuwaiq Academy (Game Development & Cloud Computing), backed by hands-on experience in IT support. I possess an analytical mindset and a scientific methodology that have grown with me since representing the Kingdom as an ambassador for the international GLOBE Program in 2015. Today, I look forward to leveraging these skills to deliver smart software solutions and exceptional user experiences.

EDUCATION

Bachelor of Computer Science – Minor: Programming and Computer Science

College of Computers and Information Technology.

Graduation Date: 22/06/2023

EXPERIENCE

Cluster 2 Airports – Support IT Department

Cooperative Training | January 2023 – June 2023

- Provided technical support and troubleshooting.
- Monitored systems and assisted in user account management.
- Supported IT infrastructure projects.

SKILLS

- Web Development (HTML5, CSS3, JavaScript ES6+).
- Game Development (Unity, C#).
- Cloud Computing Fundamentals.
- IT Support and Troubleshooting.
- Problem Solving and Analytical Thinking.
- Teamwork and Communication Skills.

PROJECTS

Beauty Salon Website – HTML, CSS, JavaScript

Created a responsive website with service listings, appointment booking, and an interactive, user-friendly interface.

Silent Collision and Beneath The Waves – 3D Action Game (Unity, C#)

Designed and programmed two complete 3D action games from scratch, including player–enemy interactions, movement, collision, health systems, immersive environments, VFX, sound effects, and responsive UI.
